

EXPLORER™ 300

Broadband communications

EXPLORER™ 300 is the smallest and most compact BGAN terminal in the EXPLORER™ Family. It has never been easier to stay connected.

EXPLORER™ 300 adds high-speed data transmission to phone capabilities via satellite. Particularly useful in remote areas outside terrestrial or cellular coverage, this mobile terminal is an ideal link to the world wherever you are

Easy to set-up and easy to handle

Setting up your EXPLORER™ 300 is quick and easy. Just plug in a phone, laptop or PDA, or use the Bluetooth interface, point the antenna towards the BGAN satellite - and you are online.

Your private or corporate office on the move adds little more than 1 kg to your baggage.

EXPLORER™ 300 gives you access to:

- Internet
- E-mail
- Voice calls
- Video conferencing and streaming
- Corporate servers
- Etc.

The basic system

The basic system consists of one unit only - a transceiver with integral antenna.

Features :-

- Simultaneous voice and data communications over BGAN
- High-speed data transfer up to 384 kbps
- Seamless global coverage
- Support for streaming IP at 32, 64 kbps
- Standard LAN, Bluetooth and phone interfaces
- Easy system setup and operation
- Lightweight, splash and dust proof design
- Robust, reliable and durable design
